Title IV Programs

Advantura has worked Federal Title IV programs from its inception. Our first contracts with the State of California were for one of California's Title IV-A systems, commonly referred to as welfare or Temporary Assistance to Needy Families (TANF), and for California's first Electronic Benefit Transfer system (which distributed cash benefits as well as replacing food stamps).

We provided independent review of a Request for Proposal for California's Title IV-E program, Child Welfare System/Case Management System (CWS/CMS) and performed system engineering studies on the interfaces between California Title IV systems.

Prior to founding Advantura, our president, Michael Graham had been the system architect and then deputy project manager for California's Title IV-D system, California Child Support Automation System (CCSAS). Michael negotiated with both Region 9 and national Administration for Children and Families officials and helped prepare a number of Advanced Planning Documents (APD).

Advantura has been involved with Title IV programs every year since our founding. We continue to help write Requests for Proposals (RFP) and APDs for California's Office of System Integration and continue to assist the California Department of Social Services by providing IV&V on Title IV and related systems.

About **ADVANTURA LLC**

Advantura LLC is a Native American owned company providing IT consulting services. We have served as project managers, system architects, APD/RFP specialists and security consultants for 9 years. We provide expert guidance on Healthcare, Title IV-A, IV-D, and other government programs. Our team of senior consultants provide services with unmatched integrity and professionalism.
